

Name: Priya Nair	Referring Physician: Dr. Dr. Mehta
Patient ID: P-2026-0002	Scan Type: Mammogram Screening
Age / Gender: — years / Female	Indication: Routine screening examination
Date of Scan: 2026-09-13	Report Date: 2026-09-13 16:13 UTC
	Report ID: RPT-2026-0009

2. CLINICAL SUMMARY

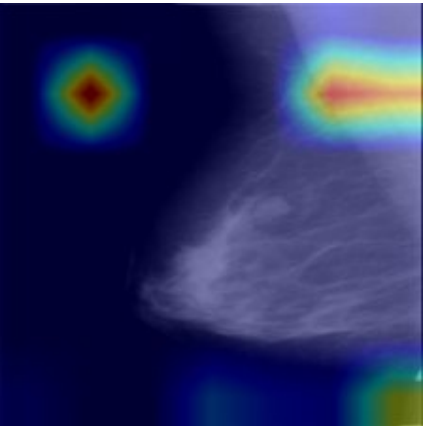

Patient evaluated for breast pathology with multimodal diagnostic risk stratification. Clinical factors were correlated against normalized baseline populations.

Age:	35	Menopausal Status:	pre_menopausal
Family History:	none	Palpable Lump:	no
Lump Size Cm:	1.2	Lump Location:	upper_outer
Nipple Discharge:	no	Skin Changes:	no

3. IMAGING FINDINGS

High-resolution diagnostic imaging analyzed with deep neural feature extraction.

- No significant suspicious features (Confidence: 16%)

AI Visual Saliency (Grad-CAM Heatmap):
Warmer colors (red/yellow) indicate focal regions that contributed highest activation weighting to the deep learning vision model decision.

4. AI AND CLINICAL ASSESSMENT

Component	Result	Interpretation
AI Image Model (ResNet-50 Binary Classifier)	0.155	ResNet-50 visual analysis demonstrates predominantly benign parenchymal features (1
Clinical Formula (Modified Gail Model)	0.100	Low risk tier (score: 0.10). Clinical inputs demonstrate baseline epidemiological risk wit.
Fusion (Weighted Average)	0.133	Risk Level: LOW

5. FINAL RISK ASSESSMENT

Final Risk Assessment: LOW

Routine annual screening and continued clinical wellness monitoring recommended.

6. RECOMMENDATIONS

- 1. Routine annual screening and continued clinical wellness monitoring recommended.
- 2. Correlate imaging observations with physician clinical palpation and symptom progression.
- 3. Provide patient with comprehensive screening summary and schedule appropriate interval follow-up.

AI Clinical Insight: The ensemble neural network and clinical risk formula converged with 95% confidence based on consistent multimodal signals.

7. CONFIDENCE AND LIMITATIONS

- AI Confidence:** High (95.0%)
- Consistent clinical parameter inputs
 - Visual pattern agreement across diagnostic layers
