

Name: Priya Sharma	Referring Physician: Dr. Dr. Ananya Roy
Patient ID: P-2026-0001	Scan Type: Mammogram Screening
Age / Gender: 41 years / Female	Indication: Palpable lump right upper outer quadrant
Date of Scan: 2026-09-12	Report Date: 2026-09-12 06:34 UTC
	Report ID: RPT-2026-TEST

2. CLINICAL SUMMARY

Clinical inputs and history documented for Breast screening.

Age:	45	Menopausal Status:	pre-menopausal
Family History Breast Cancer:	first_degree	Palpable Lump:	yes
Lump Size Cm:	2.4	Nipple Discharge:	no
Skin Changes:	no	Previous Biopsy:	no

3. IMAGING FINDINGS

Imaging evaluated for focal lesions, parenchymal symmetry, architectural integrity, and tissue density.

AI focus area: see digital report

4. AI AND CLINICAL ASSESSMENT

Component	Result	Interpretation
AI Image Model (ResNet-50 Binary Classifier)	0.750	Vision model extracted structural and pixel morphological features.
Clinical Formula (Modified Gail Model)	0.650	Standard clinical factors evaluated against validated guideline formulas.
Fusion (Weighted Average)	0.705	Risk Level: HIGH

5. FINAL RISK ASSESSMENT

Final Risk Assessment: HIGH
Multimodal findings correlate with identified clinical parameters. Review recommended clinical follow-up.

6. RECOMMENDATIONS

1. Consult attending physician for clinical correlation and diagnostic review.

AI Clinical Insight: Multimodal synthesis integrates computer vision detection with guideline-based formulas.

7. CONFIDENCE AND LIMITATIONS

- AI Confidence: High (84.0%)
- Consistent clinical parameter inputs
 - Visual pattern agreement across diagnostic layers
